

SPEAKER / EXECUTIVE BRIEFINGS

FATEH UDDIN B. MEHMOOD

Author of Ungoverned Intelligence. Governance practitioner working at the intersection of data governance, AI governance, digital government, machine-readable governance, and institutional accountability.

Signature sessions

- 01 **Governing AI at Scale**
- 02 **The Trust Stack for Boards and Executives**
- 03 **Agentic AI Governance Before Agents Act**
- 04 **Data Governance as the Foundation of Trusted AI**
- 05 **Machine-Readable Governance and the Future of Control**

What audiences leave with

- A clear language for explaining AI trust failure beneath the model.
- A seven-layer Trust Stack for diagnosing governance weakness.
- A practical control lens for data, models, applications, agents, evidence, and accountability.
- A leadership roadmap for the first 30 days, 100 days, and 12 months.
